

# Composer

Streamlining and automating wealth management product administration

Composer is an award-winning wealth administration SaaS technology solution. It helps advised and D2C investment platforms, life & pension firms and employee saving schemes improve efficiency and ensure regulatory compliance.

Composer offers a comprehensive suite of solutions to streamline the administration of wealth management products from the distribution channel to the back office.

It supports multiple investment products and asset types including the management of model portfolios. With Composer, you can consolidate your business onto a single SaaS platform, driving operational efficiency, reducing risk and automating business processes and trading.

Composer supports over five million active policies and has enabled some of the largest migrations from legacy technology. Our multi-million pound investment in upgrading the underlying technology stack of Composer, coupled with our annual R&D spend, ensures your investment is future-proofed.

## Features

- 01 Drive end-to-end efficiency**  
 Enhance operational efficiencies and lower costs with Composer's intuitive user experience and straight through processing capability, automating key back office processes to reduce manual effort and minimise errors.
- 02 Safeguard compliance**  
 We monitor the ever-changing regulatory landscape and update our systems when required so you're always compliant. It's part of our standard licence fee.
- 03 Scale through technology**  
 Tailor Composer to meet your needs today and in the future, with its scalable architecture and single code base that can easily be configured to support your business growth.

*Our relationship is stronger than it has ever been, and we are delighted with GBST as a provider for both Aegon and our new relationship with Nationwide and the 15 million customers they have. This is down to the continuous dedication of the GBST implementation team meeting aggressive deadlines and working in collaboration with Aegon IT and business teams. GBST very much take a partnership approach.*

Managing Director, Aegon

Inspiring wealth innovation

# Technology that delivers the functionality you need to optimise your business

Composer

## Intuitive user experience

Get new users up and running quickly and reduce error rates with easy navigation and guided journeys.

## Ease of integration

A suite of integration services to increase efficiency, mitigate risk and maximise opportunities for innovation.

## Modular design

Add new products and services as your proposition evolves with simple and flexible configuration.

## Modern technology

Lower cost of ownership and ensure a scalable, resilient and secure service with a SaaS delivery model.

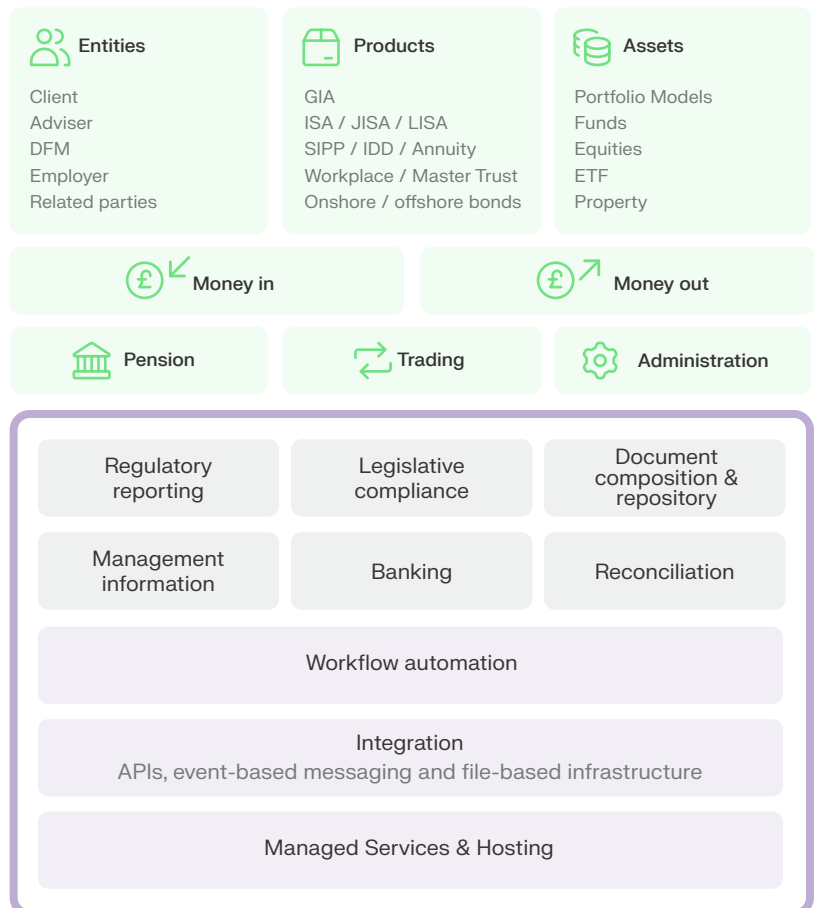

## Consolidate onto a single technology platform

Composer is a client centric solution with a wide range of product offerings. It allows you to centralise back book and new propositions onto a single platform.

Its single code base meets the complex requirements of investment platforms, employee saving schemes and pension administrators. By supporting automated administration, legislative change and product innovation, Composer helps to improve organisational efficiency, cut costs and drive business growth.

Flexible configuration options tailor Composer to your product offering, service and operational process with the flexibility to add new products and services when required.

## Back office functional overview

## About GBST

GBST is a global provider of technology and digital solutions for the wealth management and advice markets. We create vital back, middle and front-office technology solutions for wealth managers, life, pension and superannuation companies, stockbrokers, and fund managers.

Founded in 1983, GBST works with over 100 financial brands across Europe, Australia, New Zealand, the United States, Canada and the Middle East. Our technology supports over 5.5 million investor accounts under administration with Direct to Consumer, Advised and Workplace channel solutions.
